Abstract: As part of fundamental contents of ideological and political education, patriotism education is a long-term process. As an important position to train socialist and reliable successors, colleges and universities should serve as an important responsibility to stimulate college student's patriotic feelings and strength their patriotic belief.

Keywords: New Era; College Student; Patriotism Education

1. Introduction

Patriotism is the core of the Chinese spirit, fine tradition of the Chinese nation, and a powerful spiritual driving force for the continuous development of China's social history. To realize the great Chinese dream, we must persist in vigorously carrying forward the spirit of the times with the national spirit of patriotism as the core and reform and innovation as the core. College students are the hope of the nation, the future of the motherland, and the mainstay of the great rejuvenation of the Chinese nation. As the cradle of college students' growth and becoming talents, colleges and universities are an important position for cultivating socialist reliable builders and qualified successors. Colleges and universities should fully understand the status and significance of patriotism education. They must regard patriotism as the core content of ideological and political education, actively explore effective strategies for patriotism education, and cultivate excellent patriotic talents, thus promoting China's further development.

2. The Necessity of Strengthening College Students' Patriotism Education in the New Era

Strengthening the patriotism education of college students in the new era is the only way to train college students to grow into talents [1]. First of all, college students are at an important stage in the formation of world outlook, outlook on life and values. Strengthening their patriotic education will help them form correct values and thus better inherit and carry forward the excellent national spirit. Secondly, socialism with Chinese characteristics has entered a new era of development, strengthening the education of patriotism among college students, and actively transmitting positive energy to college students, it

can greatly stimulate the national self-confidence and pride of college students and enhance their confidence in socialism with Chinese characteristics, actively participate in the construction of socialism with Chinese characteristics and keep making progress in order to realize the Chinese dream of the great rejuvenation of the Chinese nation. Finally, college students are the hope of the nation, the backbone of the future of the motherland and the mainstay of the great rejuvenation of the Chinese nation. "Great achievements are due to great ambitions; great achievements are due to hard work." we must guide contemporary college students to study hard, and strive to learn scientific and cultural knowledge, down-to-earth, work hard to achieve "personal dreams", and then contribute to the realization of "Chinese dreams".

3. Patriotism Education for College Students in the New Era

3.1. Making a concerted effort in Patriotic Education by class teaching

Patriotism education is a long-term and implicit education. It only relies on ideological and political theory courses to educate college students on patriotism. The timeliness of education is not strong. Colleges and universities should establish the idea of joint force, that is, the university curriculum should jointly undertake the task of patriotism education in the form of joint force, continuously enrich the content of patriotic education in classroom teaching, and at the same time make the college students comprehensively and systematically accept patriotic education in an innovative way, creating a good patriotic atmosphere is conducive to college students to actively participate in socialist construction in the future. As an important part of college ideological and political education, patriotism education should make full use of

the main channel function of ideological and political theory courses, pay attention to the theoretical education of patriotism spirit in the classroom, and enable college students to correctly understand the scientific connotation of patriotism spirit and realize The great role of the spirit of patriotism [2]; in the course of history-related majors, strengthen students' understanding of China's long history, through the introduction of patriotic history, infect the students with the great patriotic deeds of the revolutionary predecessors, so that college students through history Recognizing the necessity and importance of the spirit of patriotism; in the curriculum of sports-related majors, we can tell the patriotic story of the Olympic athletes in the motherland, and explain the true patriotism of the new era with the Olympics as a true story of the country's glory for the country. The infiltration of patriotism enables students to realize the greatness of the spirit of patriotism and thus love the motherland with a firm faith and serve the motherland.

3.2. Innovative patriotic education Rely on new media platform

With the continuous development of new media technologies and their wide application on campus, college students are more able to accept information from the Internet, and they are more adaptable to new media. Under this situation, relying on the new media platform can effectively promote patriotism education for college students.

For example, through the campus network, campus radio, blog, public number, short video platform and other new media communication channels, build a campus network platform, and use the new media platform information diversification to timely publicize the patriotic positive events. The new media platform has a large amount of information resources to educate and train patriotic students. However, while building a patriotic online education space, we should also pay attention to eliminating the negative influence of the mass media and promoting a positive patriotic atmosphere on the campus. At present, new media technologies such as the Internet are developing rapidly. Colleges and universities should keep up with the pace of the times, carry out information, networking, and development of the patriotic education system, innovate patriotism education, and guide college students to cultivate patriotism.

3.3. Promote patriotic action by social practice activities

The spirit of patriotism flows through the blood, and patriotic actions are embodied in action. Cultivate patriotic sentiments and strengthen patriotism beliefs in practical activities, and practical activities are also a powerful way to carry out patriotic education for college students [3].

Using campus culture practice activities, patriotism education is infiltrated into practical activities. For example, using the weekly flag-raising ceremony to conduct speech contests with the theme of patriotism and love for the people, etc., inspiring students' patriotic enthusiasm in practical activities, and cultivating college students' national pride and self-confidence. Carry out various healthy and upward practical activities in the school, so that college students can learn knowledge, cultivate sentiment and carry forward the national spirit of patriotism in practice. Carry out off-campus social practice activities, actively open up new positions in patriotic education, and provide students with more intuitive and patriotic education. For example, it is possible to organize university students to visit production labor, conduct military training, visit the sites of revolutionary memorial sites, and visit social historical activities such as places of interest in the motherland, etc., to enhance college students' understanding of the history of Chinese revolution, and profoundly realize that our present good life is coming. It is not easy to enhance the patriotic feelings of college students and stimulate their strong social responsibility to work hard and serve the motherland.

3.4. Activate patriotic genes with traditional excellent culture

As a spiritual force for the development of nationality, China's excellent traditional culture is an effective means to enhance students' enthusiasm for patriotism. Traditional culture contains rich patriotism. "The world is rising and falling, the husband is responsible", and countless "Chinese stories" reflect the ardent heart of the ancestors. To strengthen the patriotism education of college students and activate patriotism genes in the new era, we must make good use of our national culture.

For example, through historical and cultural education, we will strengthen party history, national history, and military history education. While clarifying the historical development of college students, we will give full play to the role of enriching ideology and morality in the fine traditional culture of the Chinese nation [4]. For example, through the reading and teaching of traditional classics, guide and encourage college students to practice the requirements of traditional culture, creative transformation and innovative development of the patriotic tradition; for example, the use of good traditional Chinese cultural festivals, through the organization of celebrations, commemorative activities, Enhance college students' sense of belonging, identity, dignity and honor to the Chinese nation, cultivate their strong sense of social responsibility and mission, and stimulate the patriotism of college students.

In short, it is a long-term task to guide college students to establish correct ideals and beliefs and to strengthen patriotism. College students shoulder the historical respon-

sibility of realizing the "Chinese Dream" of the great rejuvenation of the Chinese nation. In the face of the important task of patriotism education, colleges and universities should make full use of classroom teaching to form a joint patriotism education. Relying on the new media platform, innovative patriotic education. Close to the students' ideological reality; use social practice activities to promote patriotic action, use traditional excellent culture to activate patriotic genes, closely integrate patriotism education with professional education, and integrate into the talent cultivation system in all directions and in multiple channels.
