Abstract: The professional basketball league does not only create material wealth, but its high ornamental spiritual wealth is widely recognized by society. With the current domestic CBA professional basketball league's introduction and use of foreign player policy and implementation of the system, it is making the overall CBA's competitive level and ornamental has been greatly improved. But it should not to be overlooked that this status will also have a certain influence on the training and development of domestic players. Therefore, this paper focuses on the adverse influence of playing time of foreign player on domestic players under the four-person six-point foreign player policy, and hopes that the discussion in this paper can have some reference value for the research and system of CBA's foreign player policy.

Keywords: CBA league; Foreign players; Influence

1. Introduction

At present, the continuous development of basketball in our country has drawn more and more attention from all walks of life. Its professional league matches have gradually been established in China. However, due to the significant difference between the development level of the domestic professional basketball league and other countries, and the league system is also very different from other leagues [1]. In particular, for the adjustment and change of foreign player, its ultimate goal is to use foreign player's superb technical level, which is making the development of the league more commercial and ornamental, so as to promote the development of CBA professional basketball league [2].

2. Research Object

For the influence of foreign player playing time on CBA players, research methods are listed as follows:

Documentation method: In the process of writing, the author searched through the databases of CBA league foreign player policy with databases such as Baidu, CNKI, Wanfang, VIP and Longyuan Periodicals, and also made reference to academic monographs published at home and abroad. The materials covered psychology,

Sports and other disciplines, which provide rich theoretical support for the study of this paper [3].

Mathematical Statistics: By SPSS 18.0 of statistical software, statistical questionnaire survey indicates to provide the basis for the study. We have used Excel software to get the raw data of statistical calculation, and make charts with Excel [4].

Logical analysis: In the course of writing, this paper draws the data results through the questionnaire results, and repeatedly reads the literature materials collected from various channels, and compares the theoretical knowledge with the actual questionnaire survey horizontally and vertically, and uses the logical analysis method to sum up and summarize integrated knowledge of the essay writing [5].

3. Results Analysis

3.1. The influence of playing time of foreign players

In recent years, the system of foreign player has been constantly changing every season and has been lack of stability. The time and number of foreign player players have increased. This has caused most of the teams to rely too much on foreign player to exert great influence on the improvement of domestic players' standards [6].

Table 1. Foreign Player Use Policies of CBA League Change over the Years

Season	Foreign player policy
2004-2005	4 sections 4 people, the last game only allows one foreign player play
2005-2006	4 regular season 4 people, 4 postseason playoffs
2007-2007	4 sections 5 people
2007-2008	Foreign player is not limited to playing time and attendance. However, with the Bayi team competition, the implementation of

	4 sections 5 (including Asian foreign player) after the 5 teams can add a sub-Asia.
2009-2010	4 sections 6 people, but with Bayi team competitions of the implementation of 4 sections 5 (including Asian foreign player)
2011-2012	4 sections 6 people, when against the Bayi team with 4 sections 5 people
2012-2013	4 sections 6 people, when against the Bayi team with 4 sections 5 people
2014-2015	League 4 single foreign player (except for Asian foreign player) after the eight teams can increase an Asia outside
2015-2016	2 people 4 sections 6 person times, the fourth quarter can only play 1 person. Asian foreign player is equivalent to the domestic players, the league after 6 teams can have 3 foreign player (including 1 Asian foreign player)

3.2. The influence of the key ball processing

In the season of 2015-2016, Sichuan team won the championship by defeating the Liaoning team with score of 4: 1. The victory of Sichuan team largely depends on the number and performance of foreign player. Sichuan

team and Liaoning team foreign player score, the number of foreign player shots and the average playing time with the domestic players are shown in the following three tables [7]:

Table 2. Scoring Tables of the two Teams Foreign Player in Five Games

Team	Team total score				Proportion	
	Sichuan team 3 foreign player	Liaoning team 2 foreign player	Sichuan team	Liaoning team	Sichuan (%)	Liaoning team (%)
First	56	48	89	103	62.9	46.6
second	60	37	96	88	68.8	42
Third	80	55	109	104	73.4	52.9
Fourth	58	44	96	87	60.4	48.3
Fifth	58	54	94	91	61.7	59.3

From the three tables, we can see from the data and the video of the CBA finals that the two teams played a decisive role in the team competition [8-10]. They scored higher points and shots than domestic players, especially behind the team under the circumstances rely on foreign player to reverse the world, so that the game has been greatly enhanced the degree of excitement, but this also

shows that on the other hand the domestic players in the game only act as a supporting role, not through the game to exercise their own level. In addition, foreign player in the game alone is not conducive to the team's overall tactical training, with the lack of smooth cooperation between players [11].

Table 3. Shots and the Total Number of Foreign Players Accounted for the Total Number of Shots for two Teams

Team	Team total score				Proportion	
	Sichuan team 3 foreign player	Liaoning team 2 foreign player	Sichuan team	Liaoning team	Sichuan (%)	Liaoning team (%)
First	50	31	82	81	60.9	38.3
second	54	37	87	84	62	44
Third	53	38	80	82	66.2	46.3
Fourth	51	39	82	87	62.6	44.8
Fifth	46	46	81	93	56.8	49.4

Table 4. Average Playing Time and the Difference of Average Playing Time with the Domestic Players for two Teams

Team	Sichuan team foreign player	Liaoning team foreign player	Domestic player		Difference	
			Sichuan team	Liaoning team	Sichuan team	Liaoning team
First	37.9	35.	21	18.8	16.9	16.5
second	39.3	36	20.3	24	19	12
Third	38.2	36.1	15.7	24	22.5	12.1
Fourth	39.1	36	19.9	24	19.2	12
Fifth	38.1	36	21	24	17.1	12

4. Conclusions

CBA occupation watching league has used a four-for-six foreign player system, and has improved the league's viewing ability, but the local players' playing time has been reduced adversely affecting the training and development of domestic players.

Due to the individual technical level and high stability of foreign player, the coach basically arranges the key ball to foreign player. In addition, the domestic players also voluntarily give the ballot to the foreign team members, resulting in the illusion of data. This has led to the lack of confidence and experience of domestic players in handling key issues. This is one of the main reasons why

domestic players often perform poorly in some international competitions.

Suggestions

We should optimize the introduction of foreign player system, and develop relevant measures and policies to save money as the standard introduction of foreign player as appropriate.

The excessive playing time for foreign player accounts for the playing time of domestic players and the improvement of the foreign player should use special policy. In addition to playing the role of foreign player, it also needs to be made enough for domestic players to get exercise. Especially in dealing with the key ball, we should give more opportunities to enhance the confidence of domestic players, and let them accumulate experience and improve their competitive level.
